Whole Milk for Healthy Kids Act of 2025 Talking Points

We appreciate the option to offer whole and 2% milk with school lunches – the new bill allows but does not require this change

Schools will need to gauge student interest in new milk choices, as well as price and availability from our vendors to determine if and when they could be available - milk options packaged for schools vary regionally

Students have a choice of milk or water with every school meal. Current limits on juice and sugar sweetened beverages ensure they are already drinking much healthier choices in school than available outside of school.
